bouncing or cyclic
theories of the universe
which are currently being
explored and tested'

**'description amp
origins of inflation
theory**

*June 2nd, 2020 - inflation
theory brings together
ideas from quantum
physics and particle
physics to explore the
early moments of the
universe following the big
bang according to
inflation theory the
universe was created in
an unstable energy state
which forced a rapid
expansion of the
universe in its early
moments'*

steinhardt**

June 2nd, 2020 - endless

universe beyond the big bang infinite collisions between our universe and a parallel world according to this theory the big bang was not the beginning of time but the bridge to a past filled with endlessly repeating cycles of evolution each accompanied by the creation of new matter and the formation of new galaxies stars and planets"

universe beyond the big bang book by paul j

April 3rd, 2020 - the big bang theory in its current form envisions a multi universe with endless space of which our universe is only a tiny part the cyclic model envisions repeating versions of a single universe spread out over endless time in a loose sense the new theory is a dual engineering term of the big bang with endless time replacing endless space'
