products''runas**

June 5th, 2020 - in puting runas is a mand in the  
microsoft windows line of operating systems that  
allows a user to run specific tools and programs  
under a different username to the one that was used  
to logon to a puter interactively it is similar to  
the unix mands sudo and su but the unix mands  
generally require prior configuration by the system  
administrator to work for a particular  
user''**microsoft windows mand line administrator s
