*April 13th, 2020 - angle deception jamming is an electronic warfare technique used against conical scanning radar systems it generates a false signal that fools the radar into believing the target is to one side of the boresight causing the radar to walk away from the target and break its radar lock on it is also known as angle walk off angle stealing or inverse con scan'***'electronic warfare and radar systems engineering handbook**

*May 20th, 2020 - abstract this handbook is designed to aid electronic warfare and radar systems engineers in making general estimations regarding capabilities of systems this handbook is sponsored by the navair director of electronic warfare bat systems department"***electronic warfare and radar systems engineering handbook**

**May 19th, 2020 - electronic warfare and radar systems engineering handbook polarization table 1 shows the theoretical ratio of power transmitted between antennas of different polarization these ratios are seldom fully achieved due to effects such as reflection refraction and other wave interactions so some practical ratios are also included table 1'**
