**November 21st, 2019 -
Minor and frequent
earthquakes should not**

cause any damage to the structure Moderate earthquakes should not cause significant structural damage but could have some non structural damage Major and infrequent earthquakes should not cause collapse Hence design is done for much smaller forces than actual seismic loads"

Identifying and Understanding Earthquakes Using Seismic

December 27th, 2019 -

Seismic activity is what scientists use to study earthquakes and identify their origin. This is the frequency, size, and type of earthquakes an area experiences over time. By studying when, where, and how strong earthquakes were in the past, we may be better able to understand future ones.

Depth variations in seismic velocity in the subducting
