'Reduction of solids by liquid cyclones as an aid to

July 31st, 2019 - The final step in apple juice clarification is normally carried out by pressure filtration Since most pressure filters operate in a discontinuous manner a reduction of suspended solids in the unclar ified juice would be expected to improve filter performance'

'Analysis of the Effect of the Underflow Orifice Size on

November 19th, 2019 - Hydrocyclones are equipments widely used in solid liquid separation as in mineral chemical petrochemical textile and metallurgical industries The suitable choice of its dimensions depends on the process main objective There is the case that the major interest is to concentrate a suspension either to discard the dispersed phase solids'
