start with 0 lines of code and end up
with a fully working interpreter for
the monkey programming language step
by step from tokens to output all
code shown and included''book review
writing an interpreter in go
May 20th, 2020 - writing an
interpreter in go will spoon feed you
through the journey of writing your
own programming language presenting
topics such as writing a lexer and
parser in such a way that even the
silliest of human beings hey there
that s me can understand them easily
i dunno to me this book is simply a
masterpiece'

'writing a brainfuck interpreter in
golang

May 20th, 2020 - i had initially
considered writing the interpreter in
c just to potentially have the option
of porting it to nodemcu and maybe
with the sd card support load and run
brainfuck programs on the go on the
nodemcu but that would be something

for later and so i decided to use
golang to write a simple prototype
for testing'

**'let s write a web assembly
interpreter part 1 richard**
