the wonders of nanotechnology with sonia contera and tom

May 29th, 2020 - the wonders of nanotechnology with sonia
contera and tom whipple in this episode we were joined by

sonia contera professor of biological physics at the
university of oxford and the author of nano es to life how
nanotechnology is transforming medicine and the future of
biology in a wide ranging conversation with tom whipple the
science editor at the times she explored the rapidly''**i**
nanorobot nature physics

May 21st, 2020 - in her new book nano es to life sonia
contera a professor of biological physics at the university
of oxford zooms into this field to explore the key
technological and scientific advances'

'the future is nano and it will revolutionise aeon

June 3rd, 2020 - is a biological physicist and

nanotechnologist she is associate professor of biological physics at the university of oxford a senior fellow at the oxford martin school and a research fellow at green templeton college she is the author of nano es to life how nanotechnology is transforming medicine and the future of biology 2019'

'sonia contera on nano es to life princeton university

March 1st, 2020 - nano es to life opens a window onto the nanoscale the infinitesimal realm of proteins and dna where physics and cellular and molecular biology meet and introduces readers to the rapidly evolving nanotechnologies that are allowing us to manipulate the very building blocks

of life sonia contera gives an insider s perspective on this new frontier revealing how nanotechnology enables a new kind of multidisciplinary science that is poised to give us control over our own biology our'

'nano es to life with prof sonia contera

January 8th, 2020 - in this book talk professor sonia
contera will talk about how nanotechnology is transforming
medicine and the future of biology oxford martin school
university of oxford oxfordmartin ox ac uk'

'nano es to life princeton university press

June 2nd, 2020 - nano es to life opens a window onto the nanoscale the infinitesimal realm of proteins and dna where physics and cellular and molecular biology meet and introduces readers to the rapidly evolving nanotechnologies that are allowing us to manipulate the very building blocks of life sonia contera gives an insider s perspective on this

new frontier revealing how nanotechnology enables a new kind of multidisciplinary science that is poised to give us control over our own biology our'
