'differential geometry and mathematical physics part i

May 10th, 2020 - differential geometry and mathematical physics part i manifolds lie groups and hamiltonian systems starting from undergraduate level this book systematically develops the basics of analysis on manifolds lie groups and g manifolds including equivariant dynamics symplectic algebra and geometry hamiltonian systems symmetries and reduction integrable systems hamilton jacobi theory including morse families the maslov class and caustics"

June 1st, 2020 - the book under review is only the first part of a projected pair the present volume deals with what the authors characterize as three building blocks each consisting of four chapters and covering respectively calculus on manifolds lie theory including lie group actions and symplectic geometry and finite dimensional hamiltonian systems'

'differential geometry

May 2nd, 2020 - differential geometry is a mathematical discipline that uses the techniques of differential calculus integral calculus linear algebra and multilinear algebra to study problems in geometry the theory of plane and space curves and surfaces in the three dimensional euclidean space formed the basis for development of differential geometry during the 18th century and the 19th century'
