November 19th, 2019 - SC MATH 1019B Solutions to Test 1A Oct 2nd 2018 9 20 points Prove that $3n^2 - 2$ is even if and only if n is an even integer Solution First we show that if n is even then $3n^2 - 2$ is even

Suppose n is even then write $n = 2k$ for some integer k .
We then find that $3n^2 = 3(2k)^2 = 12k^2 = 2 \cdot 6k^2$ and
can conclude that $3n^2$ is even.

'Deepa Kundur ECE 316 ? Communication Systems

December 21st, 2019 - Problem Sets and Solutions All the problem set questions are posted ahead of time for your convenience in case you want to study ahead. At any point in the course it is only expected however that you have covered the problem sets corresponding to the sections completed in class as bolded above.
