May 29th, 2020 - in mathematics a hyperbolic metric space is a metric space satisfying certain metric

relations depending quantitatively on a nonnegative real number ϵ between points the definition introduced by mikhael gromov generalizes the metric properties of classical hyperbolic geometry and of trees hyperbolicity is a large scale property and is very useful to the study of certain infinite groups'

'coarse quotients by group actions and the maximal roe

April 26th, 2020 - for a finitely generated group g acting on a metric space x roe defined the warped space x/g which one can view as a kind of large scale quotient of x by the action of g in this paper we generalize this notion to the setting of actions of arbitrary groups on large scale spaces we then restrict our attention to what we call coarsely discontinuous actions by coarse equivalences and show

that'
