### dual graph

May 17th, 2020 - in the mathematical discipline of graph theory the dual graph of a plane graph  $G$  is a graph that has a vertex for each face of  $G$  the dual graph has an edge whenever two faces of  $G$  are separated from each other by an edge and a self loop when the same face appears on both sides of an edge thus each edge  $e$  of  $G$  has a corresponding dual edge whose endpoints are the dual vertices'
