May 1st, 2020 - the molecular storm does most of the work and a small input of energy from a molecule like atp keeps the ratchet from slipping backward in what hoffmann refers to as a reset step this chapter describes in considerable detail just how molecules like kinesin can walk along a nanotube rail this is where we actually see the physics"capsule reviews the scientist magazine

November 22nd, 2019 - the secret of life he says is not some vital force but the unique operations of the second law of thermodynamics at the nanoscale where molecular machines from kinesins to dna synthase fueled by atp can harness the energy of the molecular storm the random bombardment of water molecules at jet plane speeds to move and work'
