blevins makes several mentions of darwinian principle

s' 'evolutionary phonology

October 25th, 2019 - evolutionary phonology is an approach to phonology and historical linguistics based on the idea that recurrent synchronic sound patterns if not inherited from the mother tongue are the result of recurrent sound changes while rare patterns are the product of rare changes or a combination of independent changes' 'panchronic phonology

May 7th, 2020 - evolutionary phonology as proposed by juliette blevins building on work by john ohala considers phonetic variation as the primary source of phonological change this emphasis on the phonetic bases of change encourages a continuous dialogue between experimental phonetics and historical phonology'

'phonology

May 23rd, 2020 -

phonology is a branch of linguistics concerned with the systematic organization of sounds in spoken languages and signs in sign languages it used to be only the study of the systems of phonemes in spoken languages and therefore used to be also called phonemics or phonematics but it may also cover any linguistic analysis either at a level beneath the word including syllable onset

and' 'developmental origins of adult phonology the interplay

April 12th, 2020 - in this paper fragments of a theory of emergent phonology are presented phonological patterns are seen as products of cultural evolution adapted to universal biological constraints on listening speaking and learning it is proposed that children develop adult phonology thanks to the interaction of the emergent patterning of phonetic content and the adaptive

anization of sound structure'

'evolutionary phonology the emergence of sound patterns

June 3rd, 2020 -
