Yeast in food spoilage SlideShare
December 26th, 2019 - Yeast in food
spoilage Yeasts can be found in a
wide variety of environments such as
in plants animal Products soil water
and insects Yeasts can utilize a
variety of substrates such as
pectines and other carbohydrates
organic acids proteins and lipids
Moreover yeasts are relatively
tolerant to low pH low water
activity low temperature'

'The Yeasts A Taxonomic Study C P
Kurtzman J W Fell
November 22nd, 2019 - The yeasts are
a phylogenetically diverse group of
fungi characterized by unicellular
growth Yeasts have been used for
bread making and brewing beverages
for millennia and have become
increasingly important in
biotechnology for production of fuel
alcohol organic acids enzymes and
various pharmacologically important
chemicals' '*The first documented case
of Candida dubliniensis*

*December 4th, 2019 - In June 2008 a
25 year old man presented to the
Royal Adelaide Hospital Australia
with Candida dubliniensis
leptomeningeal disease On
examination the patient had focal
neurological deficits both sensory
and motor He tested negative for HIV
and had normal T cell subsets The
patient was treated with 6 weeks of
intravenous liposomal'* '**Clinical
