'a brief explanation of evolution thoughtco

June 7th, 2020 - the theory of evolution is a scientific theory that essentially states that species change over time there are many different ways species change but most of them

can be described by the idea of natural selection
the theory of evolution through natural selection
was the first scientific theory that put together
evidence of change through time as well as a
mechanism for how it happens'

'**depth psychology**

**June 6th, 2020 - depth psychology states the
psyche is a process which is partly conscious
partly unconscious and partly semi conscious
in practice depth psychology seeks to explore
underlying motives as an approach to various
mental disorder it believes uncovering of
deeper often unconscious motives is
intrinsically healing in and of itself'**
