'hopf bifurcation

May 27th, 2020 - in the mathematical theory of bifurcations a hopf bifurcation is a critical point where a system s stability switches and a periodic solution arises more accurately it is a local bifurcation in which a fixed point of a dynamical system loses stability as a pair of plex conjugate eigenvalues of the linearization around the fixed point crosses the plex plane imaginary axis"introduction to applied nonlinear dynamical systems and

May 13th, 2020 - the book is suitable for use as a textbook for graduate courses in applied mathematics or cognate fields it is written in a readable style with considerable motivation and many insightful examples overall the book provides a very accessible up to date and prehensive introduction to applied dynamical systems'
